Introduction to networking for complete beginners

Your progress

Share

Great job! You are ready to move on to the next lecture.

You got 14 out of 15 correct.

✓ What you know ⓘ

It separates the IP address into the network and host addresses

It is the most important device in the network if you want to share the Internet connection:

How many useable IP addresses will I get with the following subnet mask? 255.255.255.0

This command shows the route taken by a packet of data to the destination IP address

You can use it to verify basic connectivity to a network host
